How well do we understand the Dark Web?

We know that the Dark Web is filled with marketplaces that are often frequented by those with malicious intent – but how much do we know about these marketplaces' impact on our industries?

More importantly, as security leaders within our various industries, how can we better understand the Dark Web and how can we prepare ourselves to deal with potential Dark Web threats?

The Dark Web is only one piece of the puzzle

#RSAC

We should seek to understand the Dark Web in the context of the larger strategic situation and understand its place alongside other intel collection sources.

Strategic Considerations

“What am I trying to Protect?”

“Who are my adversaries and how should I prepare for them?”

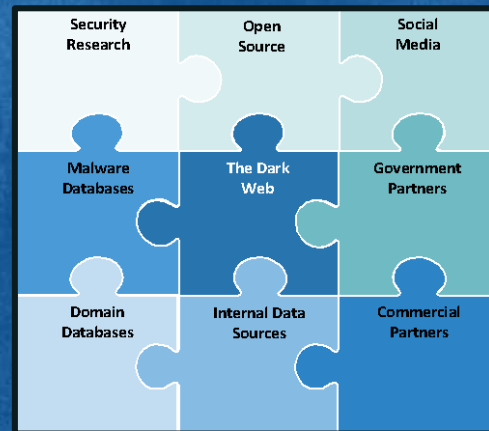

“What matters most?”

“How determined are my adversaries and how likely are they to focus their efforts against us?”

“How can my organization be held at risk both now and in the future?”

The Threat Intelligence Puzzle

Threat intelligence is a puzzle that is comprised of many pieces

A framework for understanding the challenge
